Dialysis Water Purification System

Water Treatment Unit Systems and Runs

## ABOUT US

Our company Galata Global Resources is mainly operating in the medical equipment market and specialized in hemodialysis equipment and services since 2008.

The head office is located in Turkey and our company is ready to serve your needs with high-quality products and global distribution channels.

We offer a full range of Dialysis Machine, Dialysis Spare Parts, Dialysis Concentrates, Dialysis Disinfectants, Hemodialysis Dialysers and Filters, Dialyser, Fistula Needles, Dialysis Catheter and all the related equipment and by-products.

Express delivery is available via DHL, UPS, TNT for your urgent needs. Our main markets are Uzbekistan, Azerbaijan, Kazakhstan, Russia, Afghanistan, Argentina, Togo, Bulgaria, Greece, Congo, Papua Guinea, Burundi, Thailand, SouthAfrica, Angola, Sudan, Tunisia, Egypt ,Morocco, Algeria, Niger, Nigeria, DRC, Chad, Gabon, Ghana, Kenya, Botswana, Uganda, Somalia, Yemen, Oman, Cameroon, Mauritania, Burkina Faso and many other countries..

We finalize TURNKEY projects for the dialysis center setup and provide the most efficient solution with regard to our customer's needs.

Our main services and supply availabilities are;

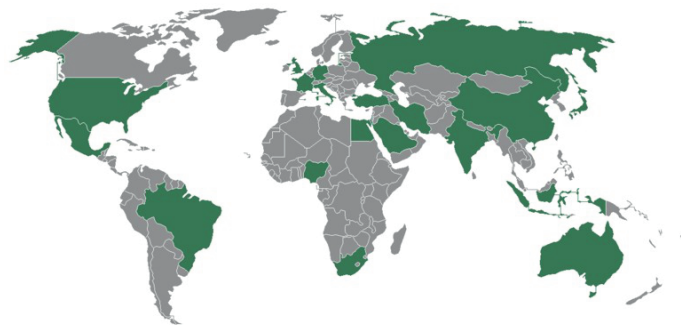

- Dialysis center supplies
- Dialysis machine maintenance and repair
- Dialysis machine spare parts supply
- Dialysis concentrates and powder solutions supply
- Medical products for dialysis facilities
- Dialysis machines and acute

Bicarbonate Cartridge for Dialysis, Filters, A V Fistula Needles, Dialysis Disinfectants, Dialysis Catheter, Water Treatment Powders, Dialyzers are also available to your requests.

### A BETTER QUALITY OF LIFE COMMITMENT

Our goal is to provide the best solutions to distinguished patients in their treatment process. In addition to our core products and services, we pursue this goal by cooperating with global associations and organizations that advocate the interests of dialysis patients. In order to help patients lead a healthier and more active life, we develop our own initiatives.

## Dialysis Products

Dialysis products Professional quality, reliable and affordable items directly to customers in world wide delivering. Galata Global Company The Best Supplier Dialysis Products, Marketing And Distribution Company and European High Quality Products At Affordable Prices for dialysis items.

We are dedicated to providing the hemodialysis community with the highest quality products along with the most reliable delivery service in the country, and is continuously discovering new ways that will improve the quality of care dialysis patients receive, while enabling dialysis providers to deliver that care at the most affordable prices.

### HEMODIALYSIS PRODUCTS & DISPOSABLES

We provide high quality, reliable and affordable dialysis products directly to customers with Worldwide delivery alternatives. Galata Global Resources is dedicated to serving the hemodialysis community with the highest quality, most reliable delivery and continuous quality improvement with the most affordable prices.

### HEMODIALYSIS PRODUCTS

- DIASAFE Fresenius
- Dialysis Line/Hemodialysis Blood Tubing Set
- Hemodialysis Catheter
- Needleless & Needle products
- Disposable Central Venous Catheter Kit CVC Dialysis
- Dialysis Bibag 2000ml
- Hemodialysis system computer interface accessories
- Dialysis Drip Infusion Set
- Vascular Access Device( Single, Double, Triple, Lumen)
- Catheter plasters & Surgical Drapes
- Absorbent dressing & Woundcare Disposables

### SAFETY & QUALITY

CE Mark, ISO 13485, IO 9001, cGMP

## DIALYZER

All dialyzers now in clinical use are of the hollow-fiber type with membranes of cellulose, modified cellulose or synthetic polymers. The function of a dialyzer is to return the internal milieu to a more normal state through water removal and solute exchange between blood and dialysate. Water removal depends on the hydraulic permeability of the membrane.

Dialyzer, a dialysis machine instrument for separating substances in solution by unequal diffusion through semipermeable membranes. Galata Global Medical offers distinguished brands such as; Fresenius 4008,5008,5008S, Nipro, BBraun, DORA, GAMBRO, ASAHI and many more. Also high quality dialysis machine filters with different sizes and specifications (1.0m<sup>2</sup>, 1.1m<sup>2</sup>, 1.3m<sup>2</sup>, 1.4m<sup>2</sup>, 1.5m<sup>2</sup>, 1.6m<sup>2</sup>, 1.8m<sup>2</sup>, 1.9m<sup>2</sup>, 2.1m<sup>2</sup>, membrane dialysis filters) are available.

- Fresenius Classic, CorDiax Dialyzer
- Nipro Dialyzer
- Asahi Dialyzer
- Gambro Dialyzer
- B-braun Dialyzer
- Dora Dialyzer

## SAFETY & QUALITY

CE Mark, ISO 13485, IO 9001, cGMP

## AV FISTULA NEEDLE

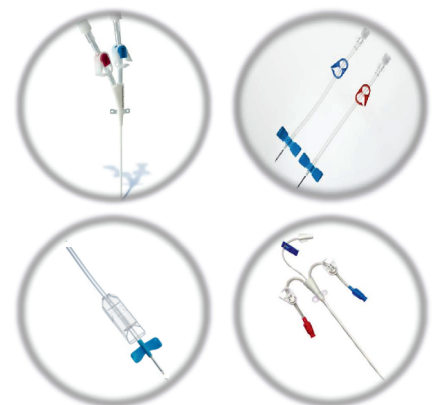

A fistula needle is a link connecting the patient to the start of efficient and safe dialysis treatment. Safety and biocompatibility is our main concern and with that responsibility, we offer the best solutions. When the kidneys can no longer clean the blood, dialysis may be needed. The most common form of dialysis is called hemodialysis. In hemodialysis, blood from an artery in your arm flows through a thin plastic tube to a machine called a dialyzer. The dialyzer filters the blood, working as an artificial kidney, to remove the extra fluids and waste from the blood. Adjustable for vein types and optimal needle selection provided for the well being of the patient.

- Fresenius, Nipro, BBraun, Dora, Baxter needles are ready for your requests.
- Safety
- Biocompatibility
- Optimized geometry and flow

## DIALYSIS CATHETER

Hemodialysis is a medical procedure of filtering blood for the people suffering from kidney failure. The process is carried out through a dialysis machine using a catheter as an interconnection. The catheter used in hemodialysis consists of two types of lumens, colored in red and blue for clear identification during the process. The red-colored lumen injects blood from the patient and transfers it to hemodialysis machine for filtration, We offer the global dialysis catheters for dialysis centers. The order to avoid infection which is a serious risk for dialysis patients, we need to choose the right catheter. We provide products from Baxter, B-braun, Nipro, Nikkiso, Asahi, etc to overcome these risks.

# Galata Global Medical Company

## DIALYSIS AV SET BLOODLINE

The products are made with Medical grade Plastic Material, the injection sites are Latex Free, the patient connectors are self-ejecting and all the bloodlines are sterilized by Radiation and easy access to dialysis machine components.

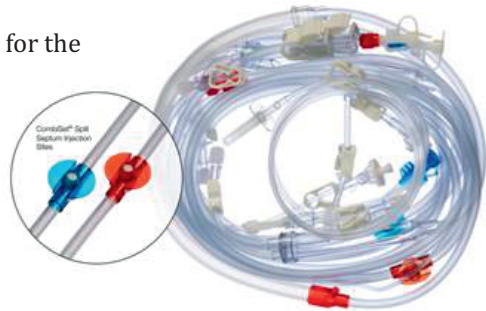

The bloodline product range provides a safe and reliable choice of models for the

### Following Equipment:

- Nipro Av Set
- Fresenius 2008-4008-5008
- Gambro AK100-AK200
- Nikkiso DDB
- Dora Av Set
- Rontis Av Set

### TO BE USED ON DIFFERENT THERAPIES :

- Double-needle Therapy
- Single-needle Therapy
- Single-needle Cross-over
- Hdf

## CATHETER FIXATION TAPE

Catheter tape can be universally used with a wide range of lines, tubes and virtually all catheter brands and types. A catheter is designed to secure the catheter in a channel created by a foam insert and a fabric loop over-strap. This does not utilize adhesive to secure the catheter in place allowing for freedom of movement and patient comfort. The degree of rotational and horizontal movement.

- Cotton products are the most suitable and healthy for consumption
- Zinc oxide adhesive keeps its stickiness for a long time without any skin irritation.
- Strong resistance to deformation. User-friendly.
- Radiotransparent, No need to remove for x-ray procedures.
- Various size and shape available

## USED AND REFURBISHED DIALYSIS MACHINES

Galata Global Resources Company provides refurbished or used dialysis & machines from well-known brands such as Fresenius, B-braun and Gambro Dialysis with the highest quality and best conditions available after many inspections.

Also, we provide maintenance, repair and technical service support with our Professional staff available to serve your needs globally.

Our experienced technical personnel with state-of-the-art measuring instruments and technical equipment, provides maintenance and repair services in accordance with ISO standards, within the framework of high-quality service of dialysis devices. Warranty and full after-sales support available.

## DIALYSIS TECHNICAL SERVICE AND EQUIPMENT SPARE PARTS

We are operating in Dialysis Machines maintenance, repair and technical service business, since 2004, with high quality service and trust oriented relation with our customers.

All new or refurbished equipment for Fresenius and other worldwide brands are available. Just like our refurbished unit services, our spare parts go through an inspection process to ensure they are in proper working condition to minimize any unexpected failures.

The Dialysis machine Technical service team dialysis center provides technical support for Dialysis machine high level and suitable appropriate.

Direct by our team contact for maintenance requires Direct between dialysis center engineering department and us Galata global medical providing dialysis technical support services to renal center working on relationship patients, which has to be managed by dialysis center.

## TECHNICAL SUPPORT

High-Quality Parts Whole Dialysis Systems Service Parts All new or refurbished equipment parts for Fresenius and other worldwide brand parts and Equipment Manufacturer specifications. Just like our refurbished equipment process, our parts go through a comparable process to ensure they are in proper working condition to minimize any unnecessary downtime. Dialysis machines are spare parts whose design and manufacture are regulated. Planning and scheduling of maintenance work are central to a well functioning maintenance organization.

## DIALYSIS CONCENTRATES

Developing our business interests to improve the global environment and provide more comfort in everyday life through the development of anti-bacterial measures to guarantee hygiene in the field of medicine and in a wide range of other industries. Galata Global Medical is a provider of Renal consumable products also to lower the cost of your dialysis supplies.

Dialysis powder for dialysis machines, bicarbonate powder, renal dialysis machine acid concentrate solution and sodium bicarbonate on 4008 and 5008 lines are available. From distinguished brands such as NIPRO, FRESENIUS, BRAUN, GRAMBO, BAXTER, etc.

## DIALYSIS DISINFECTANTS

Patients need to use a dialysis machine to undergo artificial dialysis. After use, washing is required to remove contaminants from dialysis machine. For this washing, we develop and manufacture the disinfectant cleaning agent for dialysis machine. There are three essential requirements for a disinfectant cleaning agent for hemodialysis machine. Available to your needs with a variety of alternatives and competitive prices. We will make the proposal best suited to your institution based on our extensive research, experience, and achievements which includes developing the first disinfectant cleaning agent for hemodialysis machine world-wide.

# Galata Global Medical Company

## DIALYSIS BICARBONATE, ACID CONCENTRATES

GALATA GLOBAL Resources Company is a provider of High-Quality Renal consumable products. Lower the cost of your dialysis supplies. Dialysis powder for dialysis machine dry, dialysis powder bicarbonate. Renal dialysis machine acid concentrate solution and sodium bicarbonate on line 4008 5008 bibag consumable. We supply various types of high-quality Dialysis medical supplies Hemodialysis bibag (Solution & powder form) or all brands of dialysis machines NIPRO, FRESenius, BRAUN, GRAMBO, BAXTER, etc, which is provided at a pretty reasonable cost to the dialysis centers.

### Packaging Details

Dialysis sodium bicarbonate 650g, 700g, 900g per on line bag Powder and Liquid Bicarbonate Concentrates, Liquid Sodium Bicarbonate.

## BICARBONATE FOR DIALYSIS

Hemodialysis class sodium bicarbonate was developed specifically for use in dialysate products and meets exacting global medical standards. In addition to quality dialysis product offerings, we have played a key role in the treatment of chronic kidney disease through our Partners in Quality Care program. Together with leading nephrology experts, we have developed educational resources and materials for use by dialysis professionals and patients, dedicated to improving outcomes in this vital branch of medicine. Bicarbonate addition via the dialysate helps to maintain the acid-base balance in these procedures. We provide powder or dry bicarbonate concentrate for 5008, 4008 S NG machines.

## OUR WHAREHOUSE

Our warehouse is fully equipped with the latest safety standards and has the following features. We have a professional and fully trained staff and stock management. Surveillance cameras are installed for 24/7 monitoring. Power backup is available for nonstop efficiency and unbreakable energy supply for maintaining the efficacy of products.

## STERILAB REVERSE OSMOSIS PLANT

The water treatment system is the heart of hemodialysis treatment. We protect this process with the systems designed according to European quality. Since 2004, STERILAB has specialized in innovative solutions for the supply of high purity water to dialysis centers – worldwide. Galata Global medical company develops systems for the production of ultrapure and its distribution right into the dialysis machine. Innovative ring-main systems, intelligent building protection, and coupling systems in modern materials complete our product range.

- Adjustable alarm limits
- Special design for the capacity increases
- Special type RO membranes
- Highest efficiency
- High pressure pumps made from 316 L stainless steel
- Standard Equipment and Specifications
- Stainless steel frame
- Conductivity meter
- Temperature meter
- Permeate and reject water flowmeters
- Water inlet, RO membrane inlet, and outlet manometers
- Low-pressure switches

Our expertise in water treatment covers all aspects from the pre-treatment stages, through reverse osmosis, ultrafiltration and heat-disinfection systems, right up to appealing and modern media supply centers. Please contact us for the Pre-treatment systems that should be used before RO systems, according to international standards. Customized designs will be made for your facility.

## DIALYSIS WATER PURIFICATION SYSTEMS

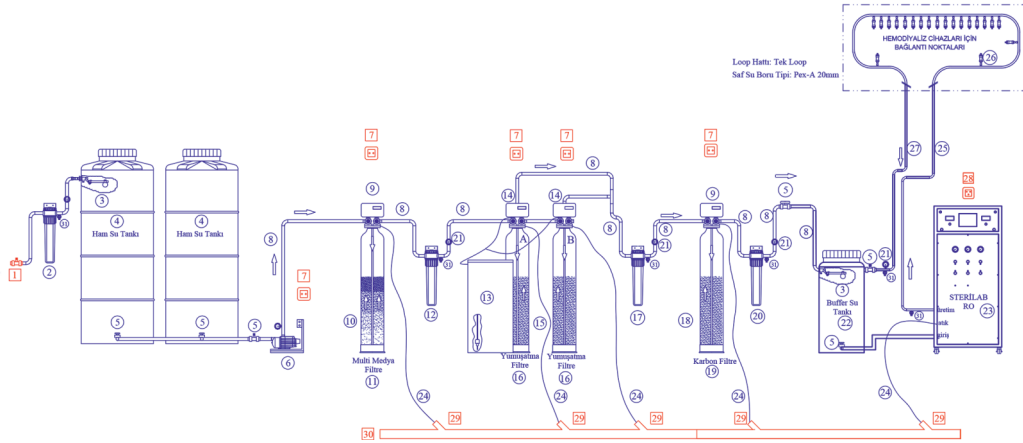

GALATA GLOBAL Resources Company is the main supplier of STERILAB purification products which is the largest supplier of the hemodialysis water system in Turkey. They offer hemodialysis providers turn-key solutions to make sure critical water needs are being served in compliance with regulations.

Galata Global Medical combines pretreatment, filtration, reverse osmosis (RO), and ultrafiltration to provide the most cost-effective system package. All of SRETILAB systems carry CE, ISO, and required certificates to comply with CSA standards.

Dialysis water purification is developed especially for Dialysis centers.

- Project and Installation
- Maintenance & Technical Service
- The System grant a maximum quality of the operator and patient
- Warranty

## WATER TREATMENT UNIT TEST AND RUNS

We look for solutions to our customers' processes by using our own testing units. We perform test runs with customers' products either on their site or in our own test lab. A test run result ensures equipment that is suitable for the product and the hemodialysis water treatment requirement.

## TRAINING

We always perform commissioning for the supplied equipment and train the customer's hemodialysis center maintenance staff. This way we can ensure a correct, trouble-free and long-term operation of the equipment.

## MAINTENANCE

We repair, modify and recondition vibratory separators and sieves, as well as pressure filters– no matter the brand with A-class expertise. After the maintenance, the equipment is close to a brand new system and will work reliably for many years to come. We constantly have a stock of different types and brands of repaired second-hand vibratory separators and pressure filters– for example Sterilab or water filtration pieces of equipment available in our warehouse suitable for many hemodialysis water system applications and more dialysis machine capacities. We keep also a large variety of spare parts on stock.
