A/V BLOODLINE SET

The bloodlines offered by GLT meet the requirements of the ISO 13485 and MDD 93/42/EEC and have the CE mark. The products are individually tested (100% test) for leak and integrity to ensure safe dialysis treatment. Depending on the type of dialysis machine, we produce wide range of different configurations of sets.

The blood lines sets can be completed with an infusion system, A/V Fistula needles and a collection bag for dialysis solution.

Type of sterilization:

Ethylene oxide, gamma irradiation.
Bloodlines are sterile, pyrogen-free, non-toxic and phtalates free.
